EXPERIENCE

Senior Frontend Engineer

Xflow

📅 Aug 2023 – Present 📍 Bangalore, India

- Implemented and configured a comprehensive alert monitoring system and distributed tracing solution, enhancing application performance visibility and enabling proactive issue detection and resolution.
- Developed an internal framework that enables seamless integration of complex, step-based Onboarding flows/widgets, significantly enhancing developer experience (DX) and streamlining onboarding process implementation.
- Built a component library using design tokens and Token Studio, ensuring seamless integration between design and frontend teams. Set up a visual testing pipeline to capture unintended component changes through snapshots.
- Developed a website calculator utilizing AWS services like Textract and Bedrock to extract and analyze bank document data, providing users with a clear, interactive breakdown of charges.🔗

Senior Software Engineer

Freshworks

📅 Apr 2023 – Aug 2023 📍 Chennai, India

- Worked in setting up the test framework for freshrelease and improving test coverage.
- Worked in various epics during this period and shipped them with better quality.

Software Engineer

Freshworks

📅 Oct 2020 – Apr 2023 📍 Chennai, India

- Worked on key accounts to provide an integration between Freshworks Products and third party applications.
- Have implemented integrations with Salesforce using Apex Classes and Apex Triggers.
- Worked on building several custom applications using React for various customers.
- Was responsible for handling several Enterprise customers.

Software Engineer - Intern

Freshworks

📅 Jan 2020 – Oct 2020 📍 Chennai, India

- Built multiple integrations within the Freshworks ecosystem.
- Handled various priority bugs and enabled prompt customer deliveries.
- Developed an integration with a CSAT application that sends timely surveys through social media.
